

Who wants to Censor?

Government, and politicians want to censor to protect us from *Fake News*.

Or do they want to protect *Fake News* from being discovered?

Big Media

Google, Facebook and Twitter all want to protect us from ourselves, by regulating what we can see and think!

We can defeat *Google, Facebook, and Twitter*, by exposing their advertisers to boycotts!

Free Speech in Civil Society

“But the First Amendment only applies to government censorship.”

Free speech is universal moral law, (Dharma), that applies to everyone. Law is not the only discipline in civil society. No one wants to associate with a censor. Censors may be exposed to market discipline in the form of boycotts.

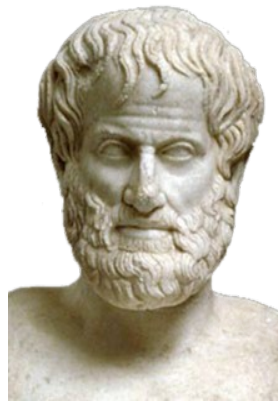

Facebook, Google, and Twitter are practicing corporate censorship, therefore do not buy from those who advertises with Facebook, Google and Twitter.

“During times of universal deceit, telling the truth becomes a revolutionary act.”

So you're
saying.....

Fake reasons for censorship

The “Carthago delenda est” excuse.

Our enemies, they say, are so evil, that any lie expedient is acceptable to defeat them. But our necessary lies may be exposed by truth, therefore, we are justified in censoring our opponents and enemies. This is also the *Marxist definition of truth* defense.

Do you trust those who want to censor?

Whenever a censorship regime is instituted, there is a mass scramble of reprehensible people, struggling for the evil power of censorship. Do you trust them?
